

CASE'S Analysis and Design Report

DATE: 2023.10.14

KEY INFORMATION

- 1· Name:** *****. **Age:** ** **Sex:** Female
- 2· Order:** *****.
- 3. Bad habit:** ***
- 4· HPI:** ***
- 5· Family history:** *****

OTHER INFORMATION NEEDED

1. Inquiry:

- Systemic disease
- Bad habit
- Already treatment
- Duration
- Family history , psychological guidance

2. Inspection:

- inside check: tooth count, tooth shape , oral hygiene, dental arch shape , occlusal status, soft tissue lesions
- outside check : photograph , symmetric face, proportion , overlength lowed 1/3

3. Auxiliary examination:

- Panoramic radiograph examination
- laterall cephlometrics
- CT

4. Other check:

- Model analysis
- TMJ check
- Muscular tension check

Inside check

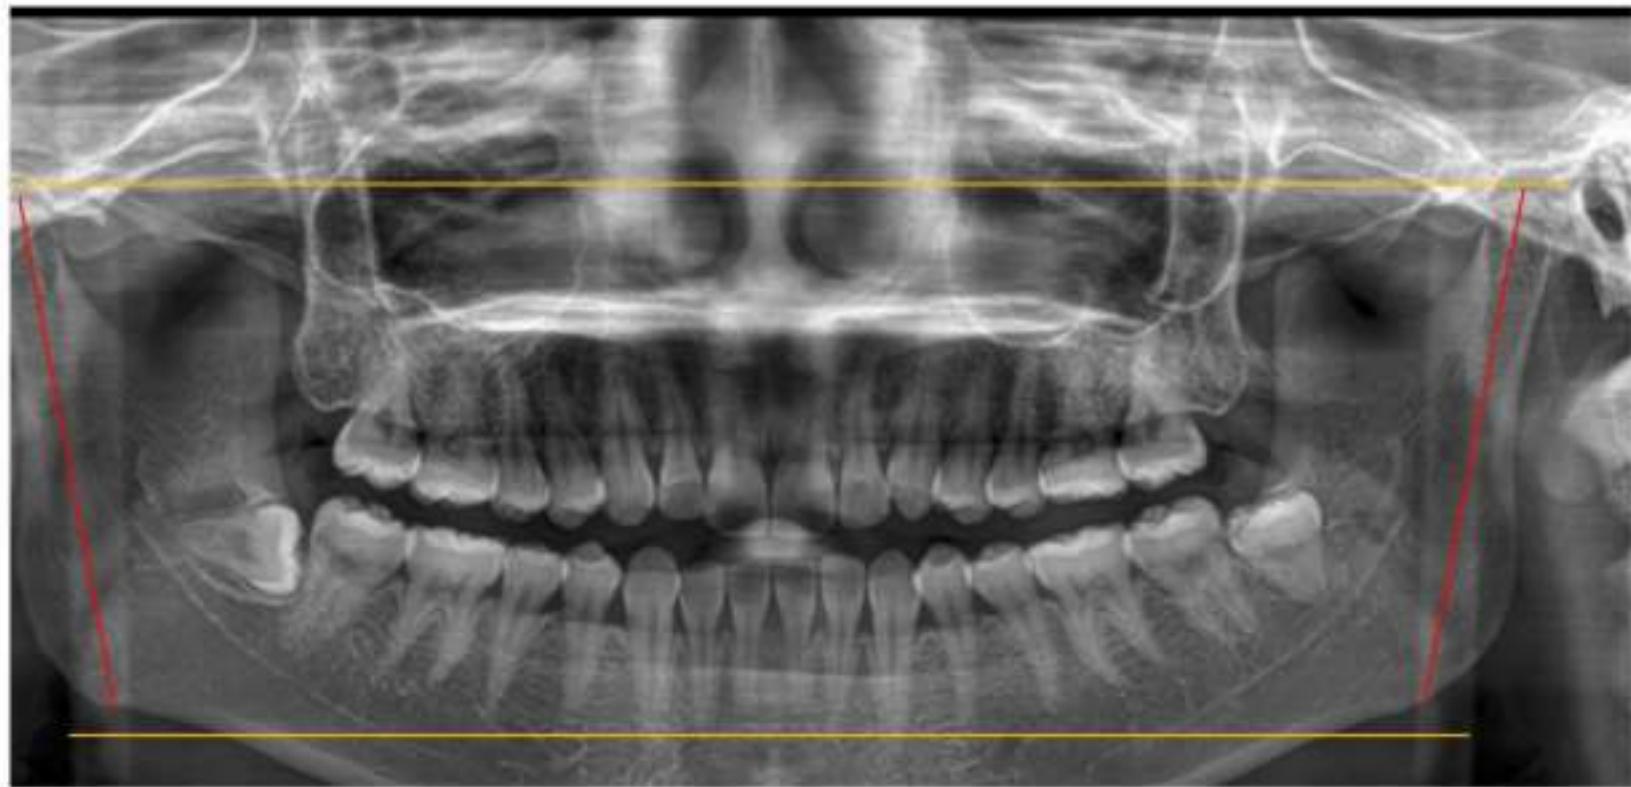

Outside check

Auxiliary examination

- Panoramic radiograph examination

Auxiliary examination

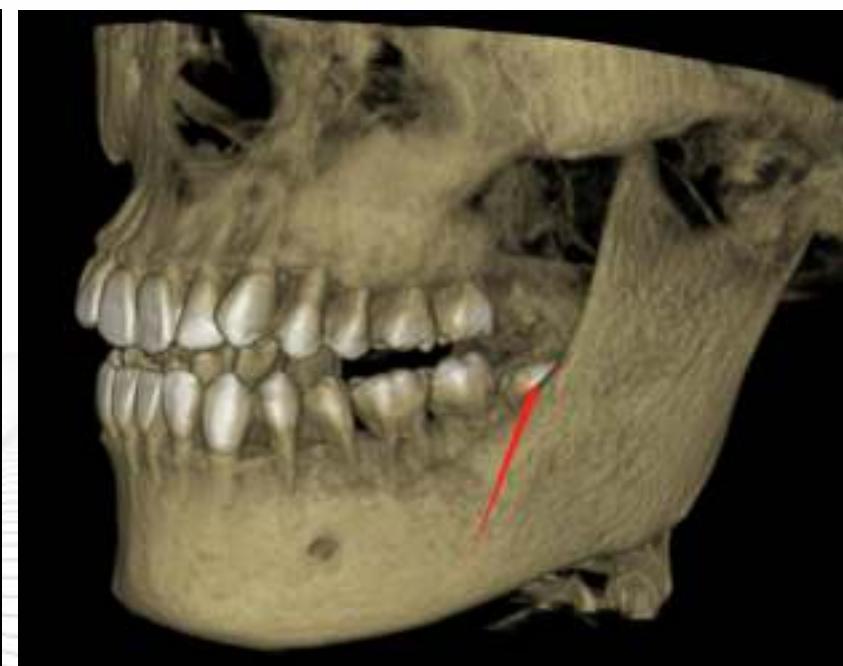

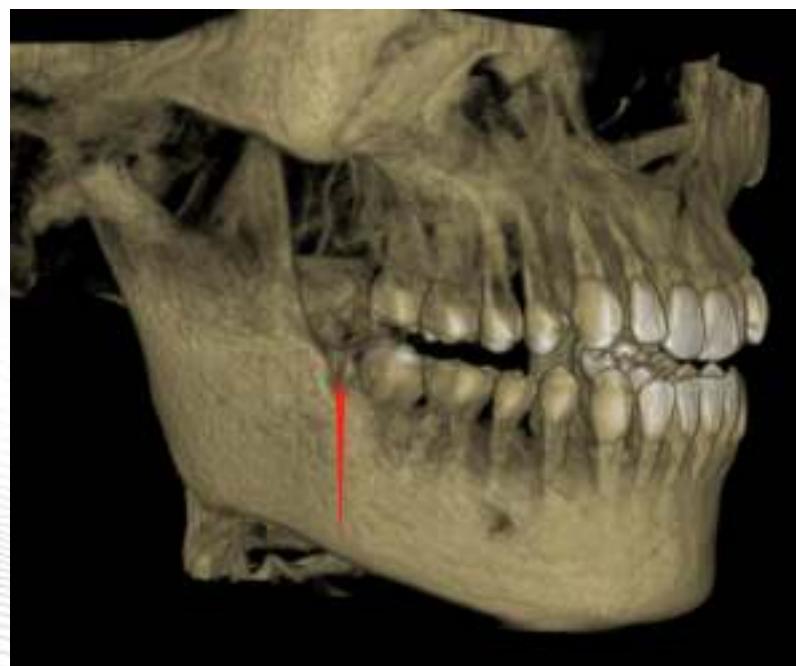

- Lateral cephalometrics

FH-NPo	90.1 *	85.4°(±3.7)
NA-APo	4.6	6.0°(±4.4)
AB-NPo	-1.9	-4.5°(±2.8)
FMA(MP-FH)	22.0	27.3°(±6.1)
SGn-FH	60.1 *	65.8°(±4.2)
OP-FH	12.2	12.4°(±4.4)
U1-L1	142.4 **	125.4°(±7.9)
L1-OP	102.4 *	111.6°(±6.0)
IMPA(L1-MP)	92.5	96.5°(±7.1)
U1-APo	1.7 **	7.2mm(±2.2)

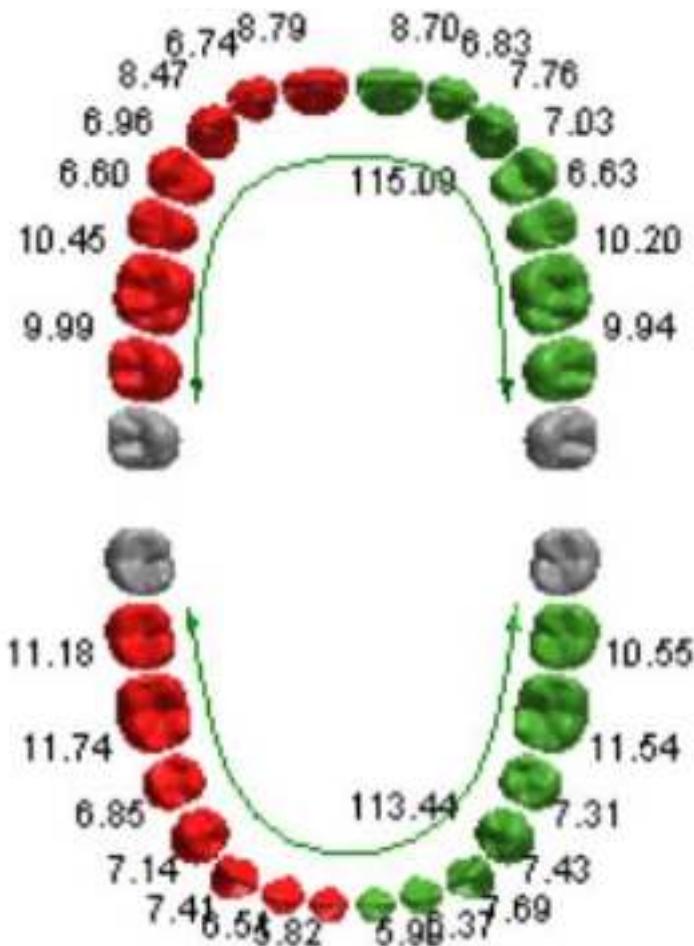

Auxiliary examination

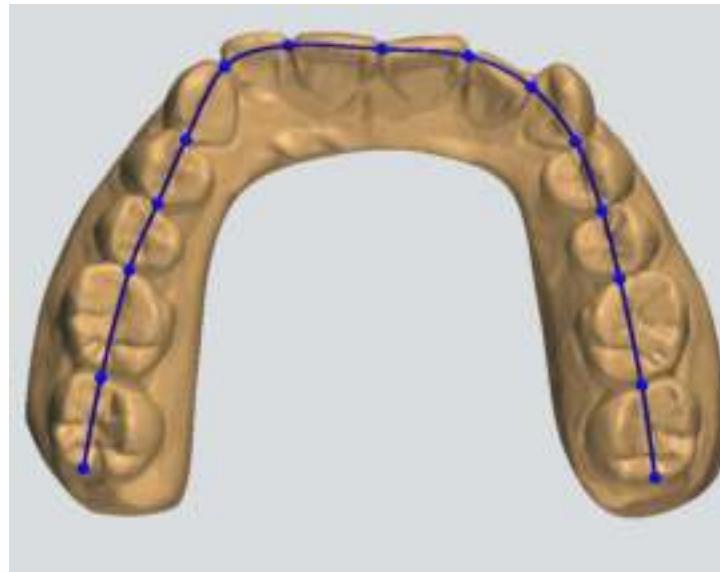

- CBCT

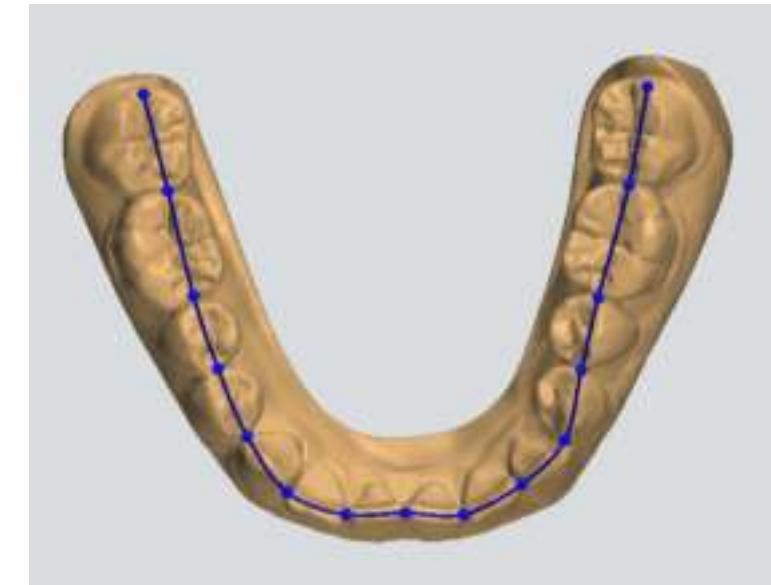

Model Analysis

Dental arch analysis

The current length of Maxillary arch :
110.30mm

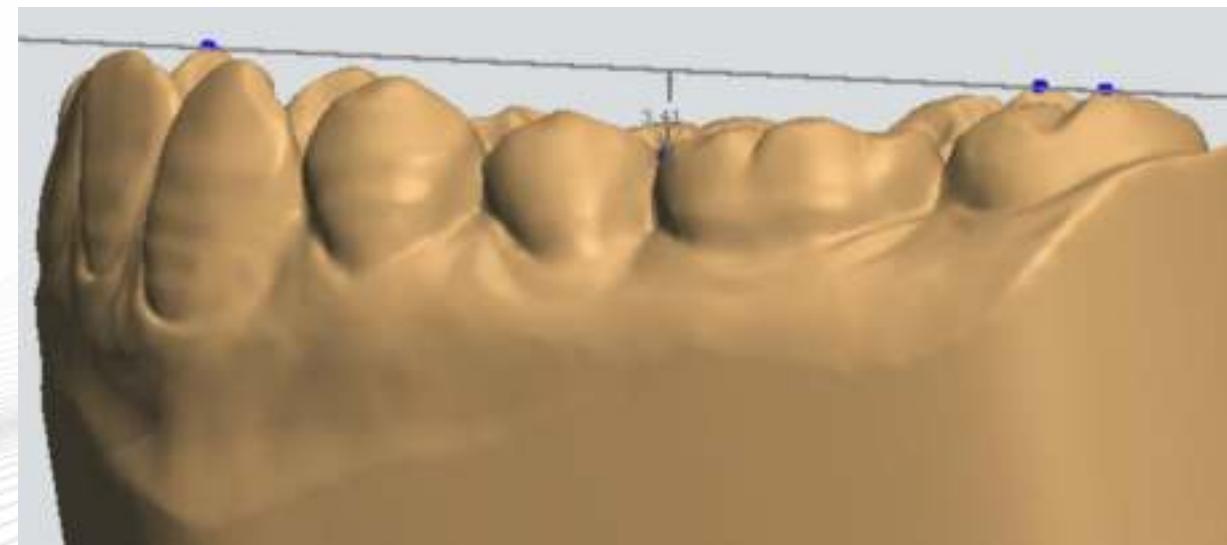

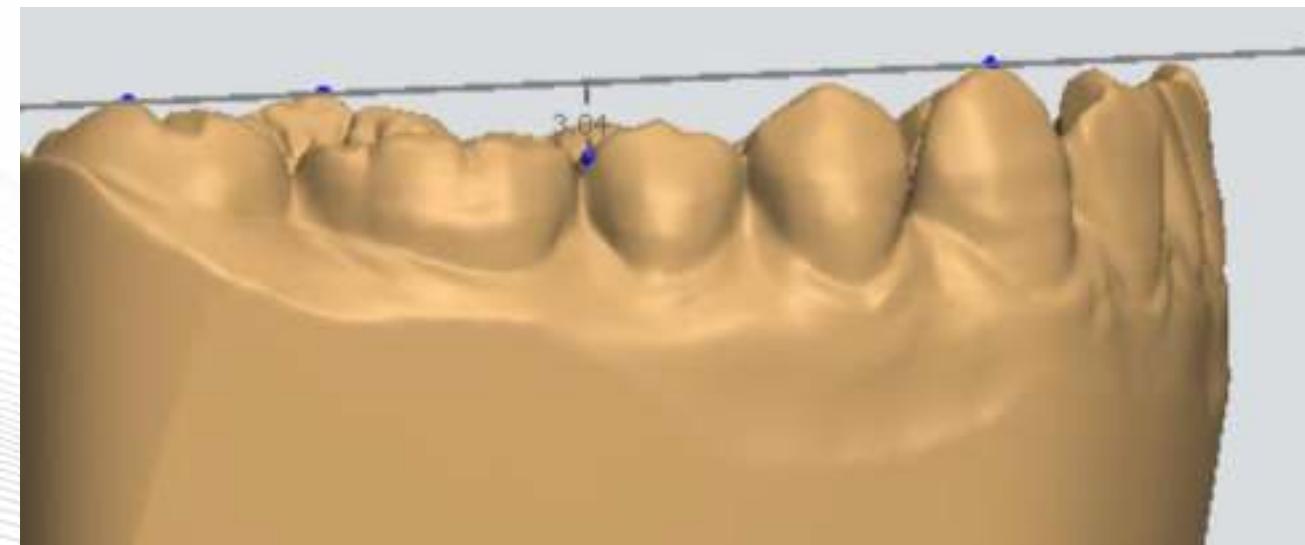

The current length of Mandibular arch :
107.24mm

(Maxillary) amount of crowded in dental arch= $115.09 - 110.30 = 4.79\text{mm}$

(Mandibular) amount of crowded in dental arch= $113.44 - 107.24 = 6.2\text{mm}$

Model Analysis

Cure of spee: $(3.04+3.41) / 2 + 0.5 = 3.725\text{mm}$

Bolton Analysis

Analysis reports

Overview

Tooth width analysis Bolton analysis Space Analysis

Standard Bolton table Default

Anterior Bolton Analysis

	Maxillary 6 width	Mandibular 6 width	Ratio
Maxillary 6 width:	47.29 mm	30.90	0.77
Mandibular 6 width:	35.71 mm	31.30	0.77
Ratio	0.84	41.00	0.77
Use calc. ratio	0.788	41.50	0.77
Calc. maxillary 6 width	50.39 mm	42.00	0.77
Calc. mandibular 6 width	37.26 mm	42.50	0.77

Ideal ratios:

Maxill. 6	Mandib. 6	Ratio
40.00	30.90	0.77
40.50	31.30	0.77
41.00	31.70	0.77
41.50	32.00	0.77
42.00	32.40	0.77
42.50	32.80	0.77

Amendment maxillary 6 width: 3.10 mm
Amendment mandibular 6 width: -2.45 mm

Overall Bolton Analysis

	Maxillary 12 width	Mandibular 12 width	Ratio
Maxillary 12 width:	95.36 mm	77.60	0.91
Mandibular 12 width:	91.71 mm	78.50	0.91
Ratio	0.96	87.00	0.91
Use calc. ratio	0.915	88.00	0.91
Calc. maxillary 12 width	100.23 mm	89.00	0.91
Calc. mandibular 12 width	87.07 mm	90.00	0.91

Ideal ratios:

Maxill. 12	Mandib. 12	Ratio
85.00	77.60	0.91
86.00	78.50	0.91
87.00	79.40	0.91
88.00	80.30	0.91
89.00	81.30	0.91
90.00	82.30	0.91

Amendment maxillary 12 width: 5.07 mm
Amendment mandibular 12 width: -4.64 mm

Bolton Index	Normal Value	Measurement Value
Bolton6	78.8±1.72%	84%
Bolton12	91.5±1.51%	96%

Analysis:

The tooth width of the maxillary 3-3 and 6-6 is narrow.

Treatment Plan Description

- ① 15 steps for upper jaw and 15 steps for lower jaw
- ② PLip tilted maxillary anterior teeth
- ③ Mandibular anterior tooth slice cutting to set more lingual side

Teeth movements overview—Subsetups count: **UPPER 15** **LOWER 15**

Attachment

0 is used as the template.

- ① 17、15、13、11、21、23、25、27、37、35、34、33、31、41、43、44、
45、47 teeth glued with attachment;
- ② occlusion attachment : 16、26 , No need for glueing.
